# TRUCK ROOF PROP

**The Straitline® Roof Prop is designed to make life easy for both transport operators and transport engineers.**

✓ **SIMPLE DESIGN**

✓ **FITS ALL SIZES / DESIGNS OF UNIT**

✓ **EASY TO ASSEMBLE**

Our roof prop is a one design fits all solution. The main section can be cut to length and easily bolted together with the preferred top and bottom assembly, to become the finished prop.

The latch mechanism is simple to use (even with gloves on) and has an open design to prevent build up of debris over years of use.

No welding required.

**Simple 3 step assembly.**

1. Cut main pole to length.
2. Drill 10mm hole in main pole.
3. Bolt together top, main, and bottom sections.  
Thread lock.

## Top Section Designs

**SINGLE PIN**  
Fits Domett Style

TP55037
